

## COVER SHEET

### Scientific Report on a Research Project funded by SNSB

This form is used for reporting the scientific activities performed and the achievements reached within a research project funded by the Swedish National Space Board (SNSB). Thus, it meets the requirements of a "Verksamhetsrapport" as requested in most research contracts from SNSB. Note that for researchers who apply for fresh funding from SNSB in the year when the scientific report is due, it is usually preferable to include the report as an attachment to the new research proposal instead of using this form.

**The Scientific Report must include:**

- short summary
- main text, i.e. report of the results (maximum 6 pages)
- list of the staff involved in the project and the funding source
- list of attendance and presentations at conferences and seminars
- list of publications in the last five years
- defence of PhD thesis by students involved in the project
- outreach activities

**The following issues should be addressed in the main text:**

- the results obtained within the project/programme
- a brief analysis of how the goals of the project stated in the application agree with the results achieved
- reasons for any divergence from the initial goals

**Submission**

- One paper copy with original signature of Research Leader, **and**
- Digital copy sent to Rymdstyrelsen@snsb.se

RESEARCH PROGRAMME		
Research Leader	Dnr	Years being reported
Affiliation	Phone	E-mail
Title of Research Programme		Web adress

Please replace this text with your own text !

The bulk text should have a font size of at least 12 points. Apart from that, you are free to format the text as you like.

In case you are using a completely different type setting system and can't use the cover sheet (page 0) as given in this document, then produce the entire report, including the cover sheet, in your own system from scratch. Please make the cover sheet as similar as possible to the one in this document.
