

Call 2025-E Planned* grants for space exploration research projects

*This list is preliminary and does not constitute a formal guarantee of funding. The Swedish National Space Agency reserves the right to correct errors and adjust payment profiles. Final decisions and terms will be published in Prisma in late December or early January, with applicant feedback to follow in January.

Dnr	First name	Surname	Gender	Organisation	Project title	Grants (kSEK)			
						2026	2027	2028	Sum
2025-00264	Åsa	Berggren	F	SLU	Impact of radiation & microgravity on viability of insects as food during prolonged space travel	1 655	1 702	1 709	5 066
2025-00266	Rodrigo	Fernandez Gonzalo	M	KI	Unloaded minds – how prolonged unloading shapes human performance in lunar gravity	1 524	1 502		3 026
2025-00267	Stefania	Giacomello	F	KTH	Spatiotemporal multiomics studies of spaceflight brains and irradiated neural organoids	1 172	1 195	1 486	3 853
2025-00272	Lisa	Westerberg	F	KI	Pilot for LifeAC Timm: understanding the immune cell dysfunction in pace and test of new countermeasures	2 156	994		3 150
Summa (tkr)						6 507	5 393	3 195	15 095
